## PRESS RELEASE

### **Nemaris Accelerates Growth with Relocation to New Office Headquarters in New York**

*New office expansion enables leading medical technology firm to accommodate headcount growth across all departments*

**August 7, 2017**

**New York**—Nemaris Inc., creator of Surgimap®, the leading surgical planning and case sharing platform, has moved its New York headquarters to 475 Park Avenue South in Midtown Manhattan.

The new office space both increases the office footprint and supports the company's growth strategy in leveraging the area's diverse high-technology talent pool. The larger space allows for additional hires across all departments, beginning with the Free Measuring Service department. Nemaris' New York expansion aligns to its recent 50% growth in its Barcelona office.

"The decision to expand our presence in New York was the logical step in our growth strategy," said Stephen Schwab, President and CEO of Nemaris, Inc. "The office environment complements our agile development process as we continuously work to enhance our platform with the goal of improving patient care. The New York area has diverse talent in the medical and technology fields, and the new office space further expands staffing and our ability to service current and future markets."

### **About Surgimap®**

Surgimap, a Nemaris Inc. innovation, was developed by a group of spine surgeons, researchers, and engineers to function as a standalone freeware that complements existing PACS solutions. Our goal is to improve physician workflow, patient care, and health care efficiency by providing image analysis, preoperative procedure simulation, and case planning tools on a secure, HIPAA-compliant, integrated sharing platform. We are based in New York and have a global presence, with thousands of users in over 85 countries (FDA Class II, CE Marking, TGA authorized).
